Developer Documentation

[MailKit](#) — email for backends

@lacspace/email-templates

Responsive HTML emails

[v1.0.4](#) · [zero dependencies](#) · [generated 2026-08-23](#)

Overview

Compose bulletproof, dark-mode-aware HTML emails from simple blocks (button, OTP code, invoice table) — no more `<table>` soup. Ships OTP/welcome/alert/invoice templates. A tiny MJML alternative.

Package: @lacspace/email-templates · v1.0.4

Kit: MailKit — email for backends

Runtime: zero dependencies

Install

```
npm i @lacspace/email-templates
```

Quick example

```
otpEmail({ code: "482913", brandName: "Lacspace" })
```

Returns: `<!DOCTYPE html>...`

Tips & warnings

TIP

Zero-dependency and isomorphic — safe to import on the server, in the browser, on the edge and in React Native. It tree-shakes, so you only ship what you import.
