@lacspace/humanize

Human-readable formatting

v1.0.0 · zero dependencies · isomorphic · generated 2026-08-23

Overview

Bytes (1.5 KB), durations (1d 1h), relative time (3 hours ago), ordinals (21st), compact numbers (1.2M), pluralize, grammatical lists and truncation — one tiny typed package instead of installing five (pretty-bytes + ms + humanize-duration + ...).

NOTE

When to use — Turning raw numbers, sizes, durations and dates into human-readable strings in the UI.

Tips & warnings

TIP

One package replaces pretty-bytes + ms + humanize-duration + ordinal + pluralize.

TIP

Zero-dependency and isomorphic — safe to import on the server, in the browser, on the edge and in React Native. It tree-shakes, so you only ship what you import.
